

TESTING PIM SYSTEM

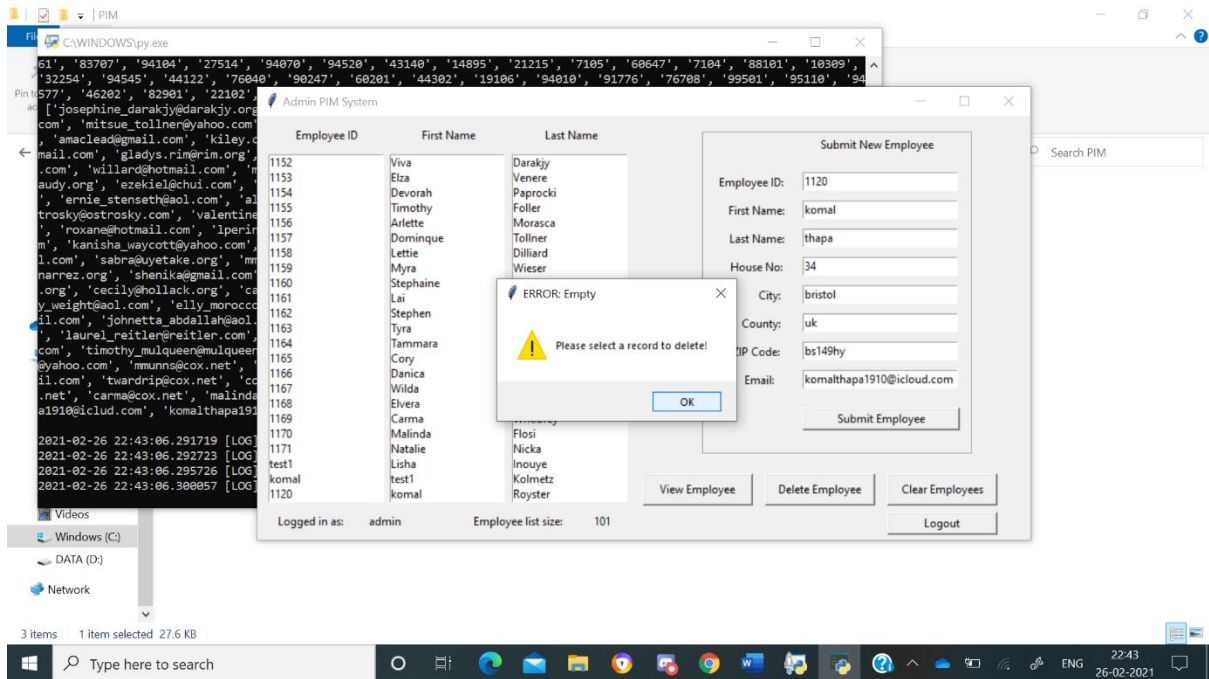

This is the log in system which will ask the user to put password and username and if it is correct than user need to get agree with the lespi and if the password is incorrect it will ask the user to try again .

This the stage in which the name of the user will appear which will show the name at the top to make sure the user is connected .

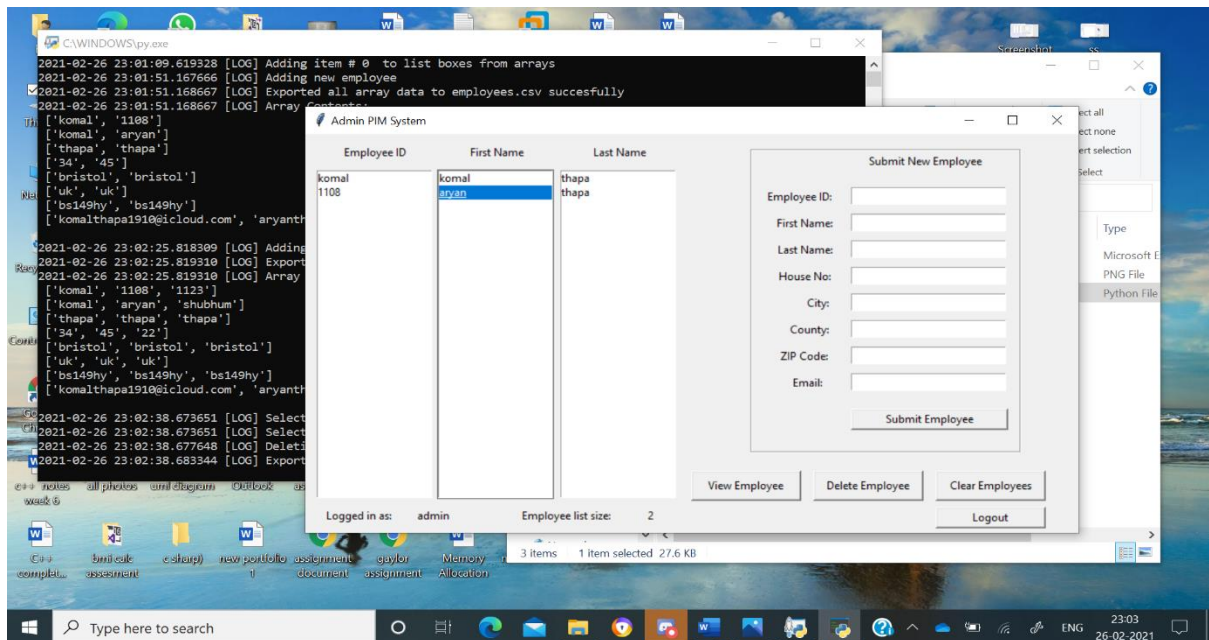

When the user will add the details and press submit then the name will be saved in the list .similarly if user select view employee the name of that person will automatically highlight on the screen .

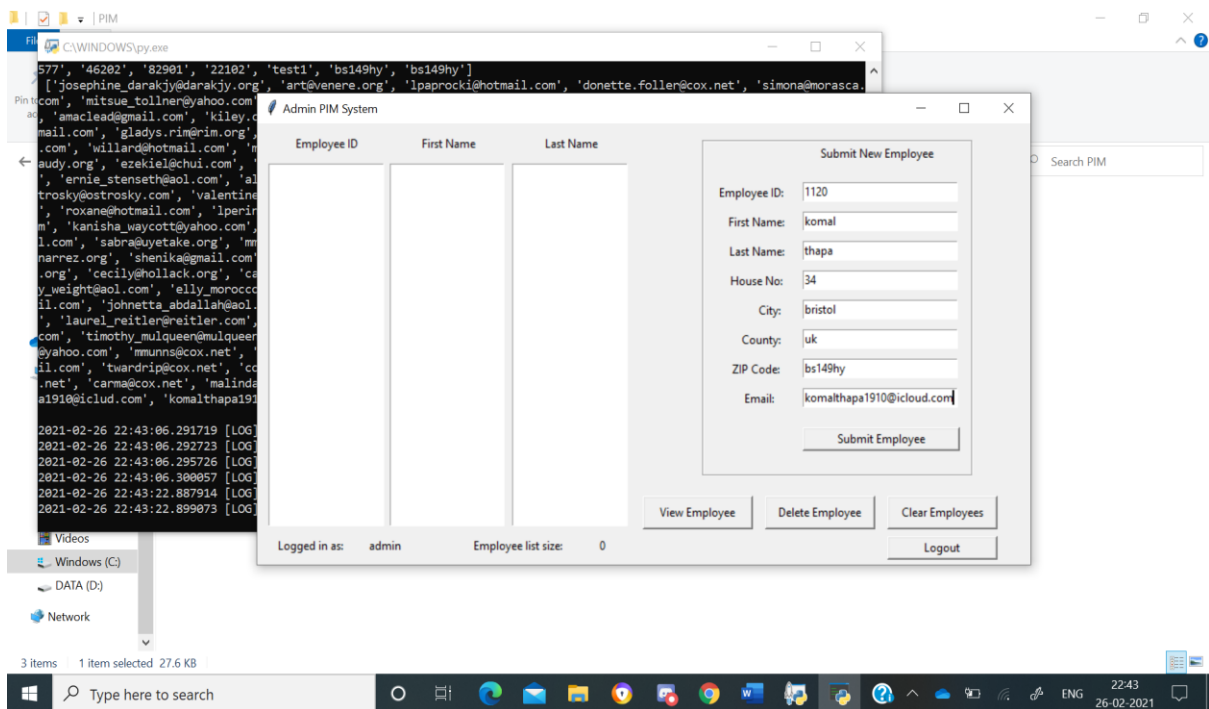

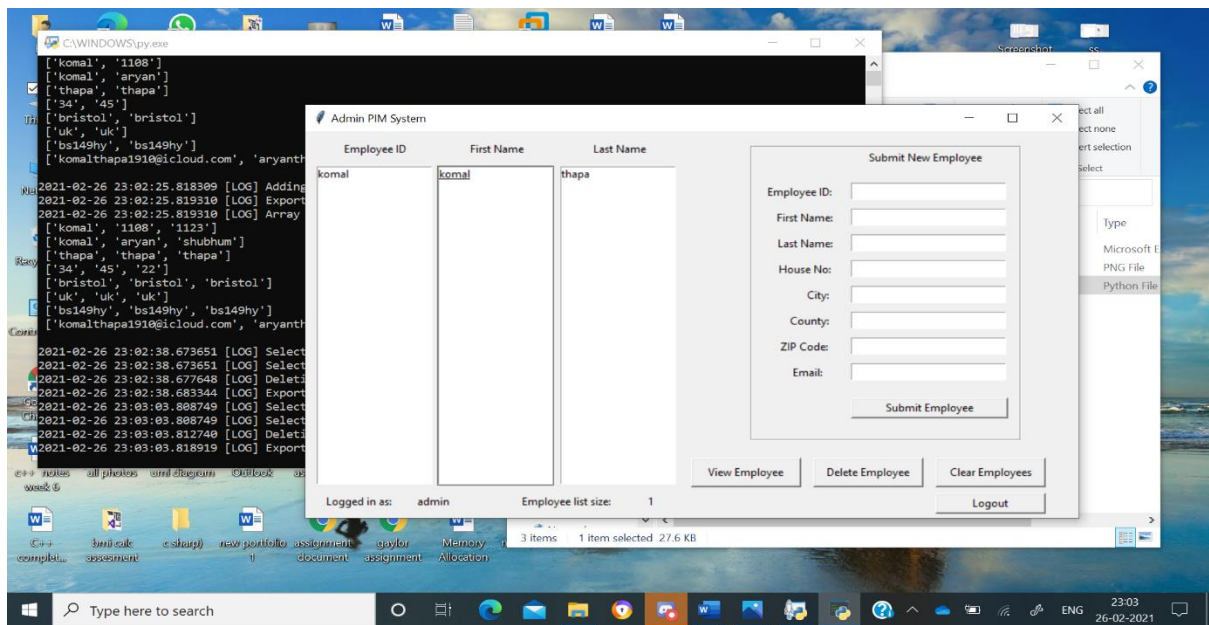

If the user wants to delete the record he need to first select that which record he wants to delete if the user will not select the record than this message will be display . Once the record is selected that detail will automatically delete.

This is when the details is selcetd to delete.

This is the after screenshot when the detal is deltd .

If the user want to clear the employees . he has to press the clear employees and the data will automatically deleted from the list .
